

CASINO TABLE GAMES PROTECTION TRAINING

— *By Richard Marcus*

Starting tomorrow, I will be publishing a 20-part series on Table Games Protection, each article focusing on a different TG and aspect of GP. The purpose of the series is to both educate you and convince you that if you want pure TGs Protection Training without the BS, I'm your guy. I also do

undercover evaluations of TGs operations, specializing in finding answers when your casinos' numbers are down and you suspect cheating and collusion. If you have previously hired GP consultants to investigate these types of problems, be it with Blackjack, Pai Gow or Baccarat, and the result is that they sold you some software, what you got was more likely than not a consultant who really doesn't know what's going on with cheating and sold you software to bail himself out. If you want the real guy to solve your collusion/cheating problems, take note of what Hard Rock AC President George Goldhoff had to say.

“

I have engaged Richard intermittently over the past 12 years. Most recently he invested 90% of his energy on the casino floor providing valuable insight and 10% with our surveillance and table games leadership. His wrap-up report identified a game that was at risk. We made a change to de-risk the game. He has a keen eye.”

I didn't sell George any software. I found the problem and solved it.

I am currently offering Table Games and Electronic Table Games Protection Training Seminars at your properties. With more than a hundred casino clients around the world, I am clearly one of the best trainers out there, and the ONLY trainer who can really put your staff in the shoes and minds of professional casino cheats. Having been one of the world's premier cheats for 25 years, my approach is direct hands-on nuts and bolts training, no fancy magic, card or memory tricks, just real Game Protection instruction that will give your casinos the best lessons on how to protect your table games, ETGs and slot machines.
